## ASPEN Patient Fact Sheet

*A Consumer Guide for Cancer Patients*

Having a discussion with HNC patients about the importance of a feeding tube can be a difficult conversation. This printable handout can help address many patient questions.

## Publication from *Nutrition in Clinical Practice*

*“Blenderized food tube feeding in patients with head and neck cancer”*

BTF mitigated weight loss, gastrointestinal symptoms, quality of life and total energy intake in a group of HNC patients who received tube feeding for 6 weeks.
