*Household measures are based on standard US, dry household measures. All measures are level and unpacked. These values are approximations only, whereas the scoops Nutricia provides are validated for use with Nutricia formulas. Nutricia North America recommends using a scale for greatest accuracy.
[†]Dilutions are more accurate using weighed powder vs. scoops. Scoops should be level and unpacked. 1 level, unpacked scoop yields 7.3 grams powder and provides 34.5 kcal. 1 gram provides 4.72 kcal and displaces ~0.70 mL water.
[‡]This chart assumes 1 fl oz = 30 mL. Water volumes are exact, but final volume of prepared formula may vary slightly.
[§]For patient safety, Nutricia directs caregivers requesting mixing instructions at non-standard dilutions to their healthcare teams.

How to Prepare
Refer to can label for full instructions

1. Measure the amount of warm or cool water into a container.
2. Add the prescribed amount of Neocate Junior Powder to the water.
3. Stir or cover the container and shake until powder dissolves.

Important Preparation Information

- If taken orally, Neocate Junior is best served chilled.
- Shake or stir Neocate Junior immediately before use.
- Discard formula left in cup 1 hour after feeding starts.
- If preparing in advance: refrigerate immediately at 35-40°F (2-4°C) and use within 24 hours.
- Do not freeze, boil, or use a microwave oven to prepare or warm formula.
- For oral and tube feeding; not for parenteral use.
- Tube feeding: Nutricia advises formula can be safely kept at room temperature up to 4 hours.

Storage

- Store unopened can at room temperature. Do not store at extreme temperatures.
- Once opened, reseal can and store in a cool, dry place (not a refrigerator). Use within 1 month.

*Household measures are based on standard US, dry household measures. All measures are level and unpacked. These values are approximations only, whereas the scoops Nutricia provides are validated for use with Nutricia formulas. Nutricia North America recommends using a scale for greatest accuracy.
 †Dilutions are more accurate using weighed powder vs. scoops. Scoops should be level and unpacked. 1 level, unpacked scoop yields 7.3 grams powder and provides 35.0 kcal. 1 gram provides 4.79 kcal and displaces ~0.69 mL water.
 ‡This chart assumes 1 fl oz = 30 mL. Water volumes are exact, but final volume of prepared formula may vary slightly.
 §For patient safety, Nutricia directs caregivers requesting mixing instructions at non-standard dilutions to their healthcare teams.
 Neocate® is a family of hypoallergenic, amino acid-based medical foods. Neocate is intended for use under medical supervision.
 ★ This chart does not apply to other Neocate Junior versions due to differences in displacement and scoop size.
